1. Click on File -> Make a copy

Include your IPO Chart with your code in Eclipse IDE: We will discuss and demonstrate this in the computer lab.

IPO CHART

Program name:	Order	
INPUT	PROCESS	OUTPUT
Hint: What will the user input?	Hint: What is the program going to do with the input information?	Hint: What will the screen display after user input?

<pre> //declaration double userOrder; double Burgers = 1.69; double fries = 1.09; double sodas = 0.99; double tax = 0.065; // 6.5% tax int burgerCount; int friesCount; int sodasCount; //user input Scanner userInput = new Scanner(System.in); System.out.println("Each burger is \$1.69"); System.out.println("Each portion of fries is \$1.09"); System.out.println("Each cup of Soda is \$0.99"); System.out.print("Enter an amount of burgers you'd like to order:"); burgerCount = userInput.nextInt(); System.out.print("Enter an amount of fries you'd like to order:"); friesCount = userInput.nextInt(); System.out.print("Enter an amount of sodas you'd like to order:"); sodasCount = userInput.nextInt(); </pre>	<pre> double FoodTotal = (burgerCount * Burgers) + (friesCount * fries) + (sodasCount * sodas); double Totaltax = FoodTotal * tax; </pre>	<pre> System.out.printf("Your total before tax: \$%.2f%n", FoodTotal); System.out.printf("Tax: \$%.2f%n", Totaltax); System.out.printf("Your final cost is: \$%.2f%n", (FoodTotal + Totaltax)); </pre>
